

### The Digital Collective Driving Digital Inclusion

## Why does DigiCo exist?

### **The Problem**

In Europe, 44% of adults still lack basic digital skills.

#### Why do we need to solve it now?

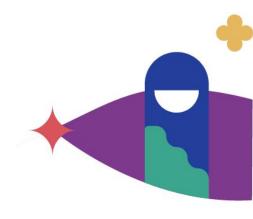

In the framework of the digital transition, digitally excluded individuals will be **even more excluded**. We need to act now to enable everyone to thrive in all aspects of society!

#### **Our Mission**

The Digital Collective is a non-profit organisation advocating for the **digital inclusion of marginalised communities** in Europe. We aim at closing the digital divide across Europe **by 2025** & across developing markets **by 2050**!

#### **Our Approach**

We drive a **fairer and more inclusive** digital society by creating solutions closest to the needs of communities by partnering up with public, private and third sector.

### What is our solution?

### **Inclusive Technology**

We drive digital inclusion by applying **technology as an enabler for the social and economic integration of individuals** in vulnerable situations.

Through our **tech platform Skillify** we provide:

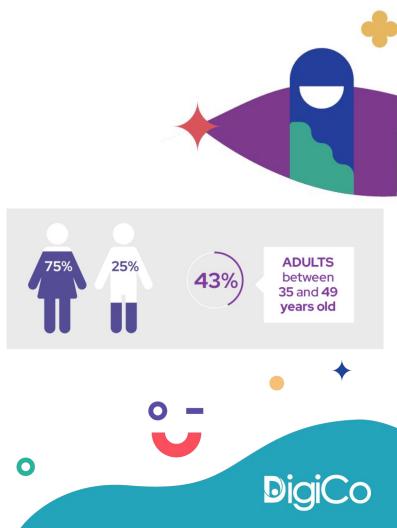

- Low skilled individuals with a **user-friendly, accessible & inclusive tool to assess their digital skills**, get training referrals and customised job ads
- Organisations across Europe with an **inclusive & accessible evaluation tool that benefits training**

	Welcome to Skillify		
Skillify Demo:	Where is Skill/Hy7 An Where is been to long pro-consistent even loss of digital and the new loss to be account of the Skill's quantum a sequences, At this and any and regardle to account on the sequences, At this and any and regardle to account one data for		
	yes one was a new programme to behavior and new strange of engineering from a price except processing. At this and yes a shift anise and to share the strange of the strange of provide the strange of the base of the strange of the strange.

### Who do we target: An Overview

- Individuals who are **Underrepresented** in policy:
  - NEETs
  - Unemployed Individuals & Job seekers
  - Work returnees/People distant from the labour market
- Individuals with a **low level of education and/or low income** (Groups who experience economic hardship)
- Ethnic minorities and/or **individuals with migration background** (e.g. refugees, undocumented or asylum seekers)
- People with disabilities
- Women

### **Our Intersectional Approach**

We target vulnerable groups through an **intersectional approach**, making sure that different set of vulnerabilities are taken into account when designing our programs:

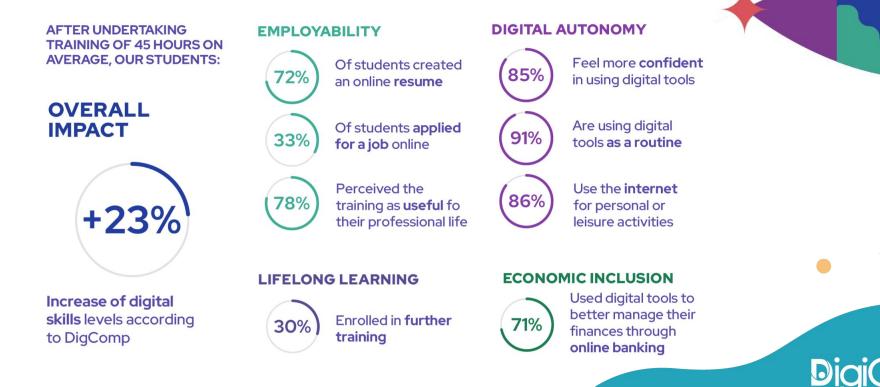

Indicative Sample:

• Cost per learner: €1,237.77 are needed to train one single low-skilled woman with parental needs

- Breakdown of costs:
  - 24 hours of training spread throughout 4 weeks
  - Face-to-face support
  - Access to IT equipment
  - Onsite childcare facilities

### **Our Impact: 1964 individuals impacted**

# **Our Impact: Awareness-raising & Advocacy**

#### Awareness-raising

- 133 members from 30 countries as members of our Community of Practice
- 8 events raising awareness on digital inclusion
- **30 publications** (Handbooks, Toolkits, Articles, Case Studies)

### **Policy Advocacy**

- We take part in EU stakeholder/policy consultations
- We provide **policy recommendations**
- We contribute to **high level panels**

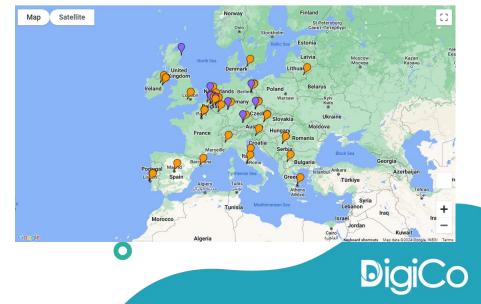

## How can we scale up?

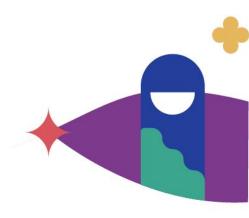

### **Our Plan**

We have tested our approach & we have impacted 1962 individuals across EU. We would like to **scale up our work in order to impact more people and more markets**.

#### How will we do it?

- Making sure that **existing infrastructures** work for disadvantaged groups
- Supporting trainers to reach those target groups through a **TTT model**
- Implementing more partnerships-based digital upskilling projects
- Increasing our **geographical scope**

### Thank you!
