PLASTIX

PLASTIX Newsletter II

An active start of 2024

On-Site Deep Dive to Slovenia

The third OSDD of PLASTIX was organised in Slovenia in the Savinja-Salek region. Our hosts, the Faculty of Environmental Protection and the Development Agency of Savinja-Salek Region, had prepared a wonderful programme for us. Thank you! Find out more under the [project news](#) or watch the [video summary](#).

Bio-based 3D printing

Additive manufacturing or 3D printing has become a common tool in innovation processes, and you can really make a difference by thinking about the materials you use. Check out what the open test bed Circlab in Värmland does with [3D printing and wood-based biocomposites](#).

Rigid plastic collection pilot

Besides plastic packages, there is a lot more plastic that is not very easy for the consumers to recycle. In Tampere region, the company Hyötykeräys Oy and the regional municipal waste management company organised a pilot for separate collection of rigid plastics and processing them into recycled raw materials. Want to know more about the [pilot](#)?

Microplastics monitoring test

The Faculty of Environmental protection is working with the monitoring of microplastics in rivers. They have carried out a successful test earlier this year and written a [blog text](#) about the
