Gov4Water

Smart, Efficient and Adaptive Water resource management

Gov4Water aims at improving **governance** and **rendering water planning climate responsive** and future proof.

Objectives

Gov4Water activities focus on:

- ▶ Identify gaps in present water management.
- ▶ Find innovative techniques and strategies for guaranteeing sufficient supply of good quality water in times of climate change.
- ▶ Reduce water consumption.
- ▶ Integrate adaptation and resilience.
- ▶ Improve coordination and collaboration of all actors.
- ▶ Render policy instruments prescriptive and effective.

Activities

Interregional seminars and Study visits

Explore, learn and implement regional practices.

Knowledge research

Drafting of living papers on the state of art of water management in the partners region.

Joint Analytical Report

Intensive workshop & Staff exchange

Deeply learn from experts and staff from the partners region.

Regional Stakeholders workshop

Reorganisation and intensification of Governance and Planning structures.

Good practice

Collect and analyse good practices for adapting water management to climate change.

Policy improvement

Step-by-step process to embed innovative practices into regional policies.
