Valobat and the Construction & Buildings Extended Producers Responsibility Review of 14 months of activities May 2023 - July 2024

Jérôme d'ASSIGNY

Director of Publics Affairs - Valobat

Jerome.dassigny@valobat.fr

09. 10. 2024 | Marseille

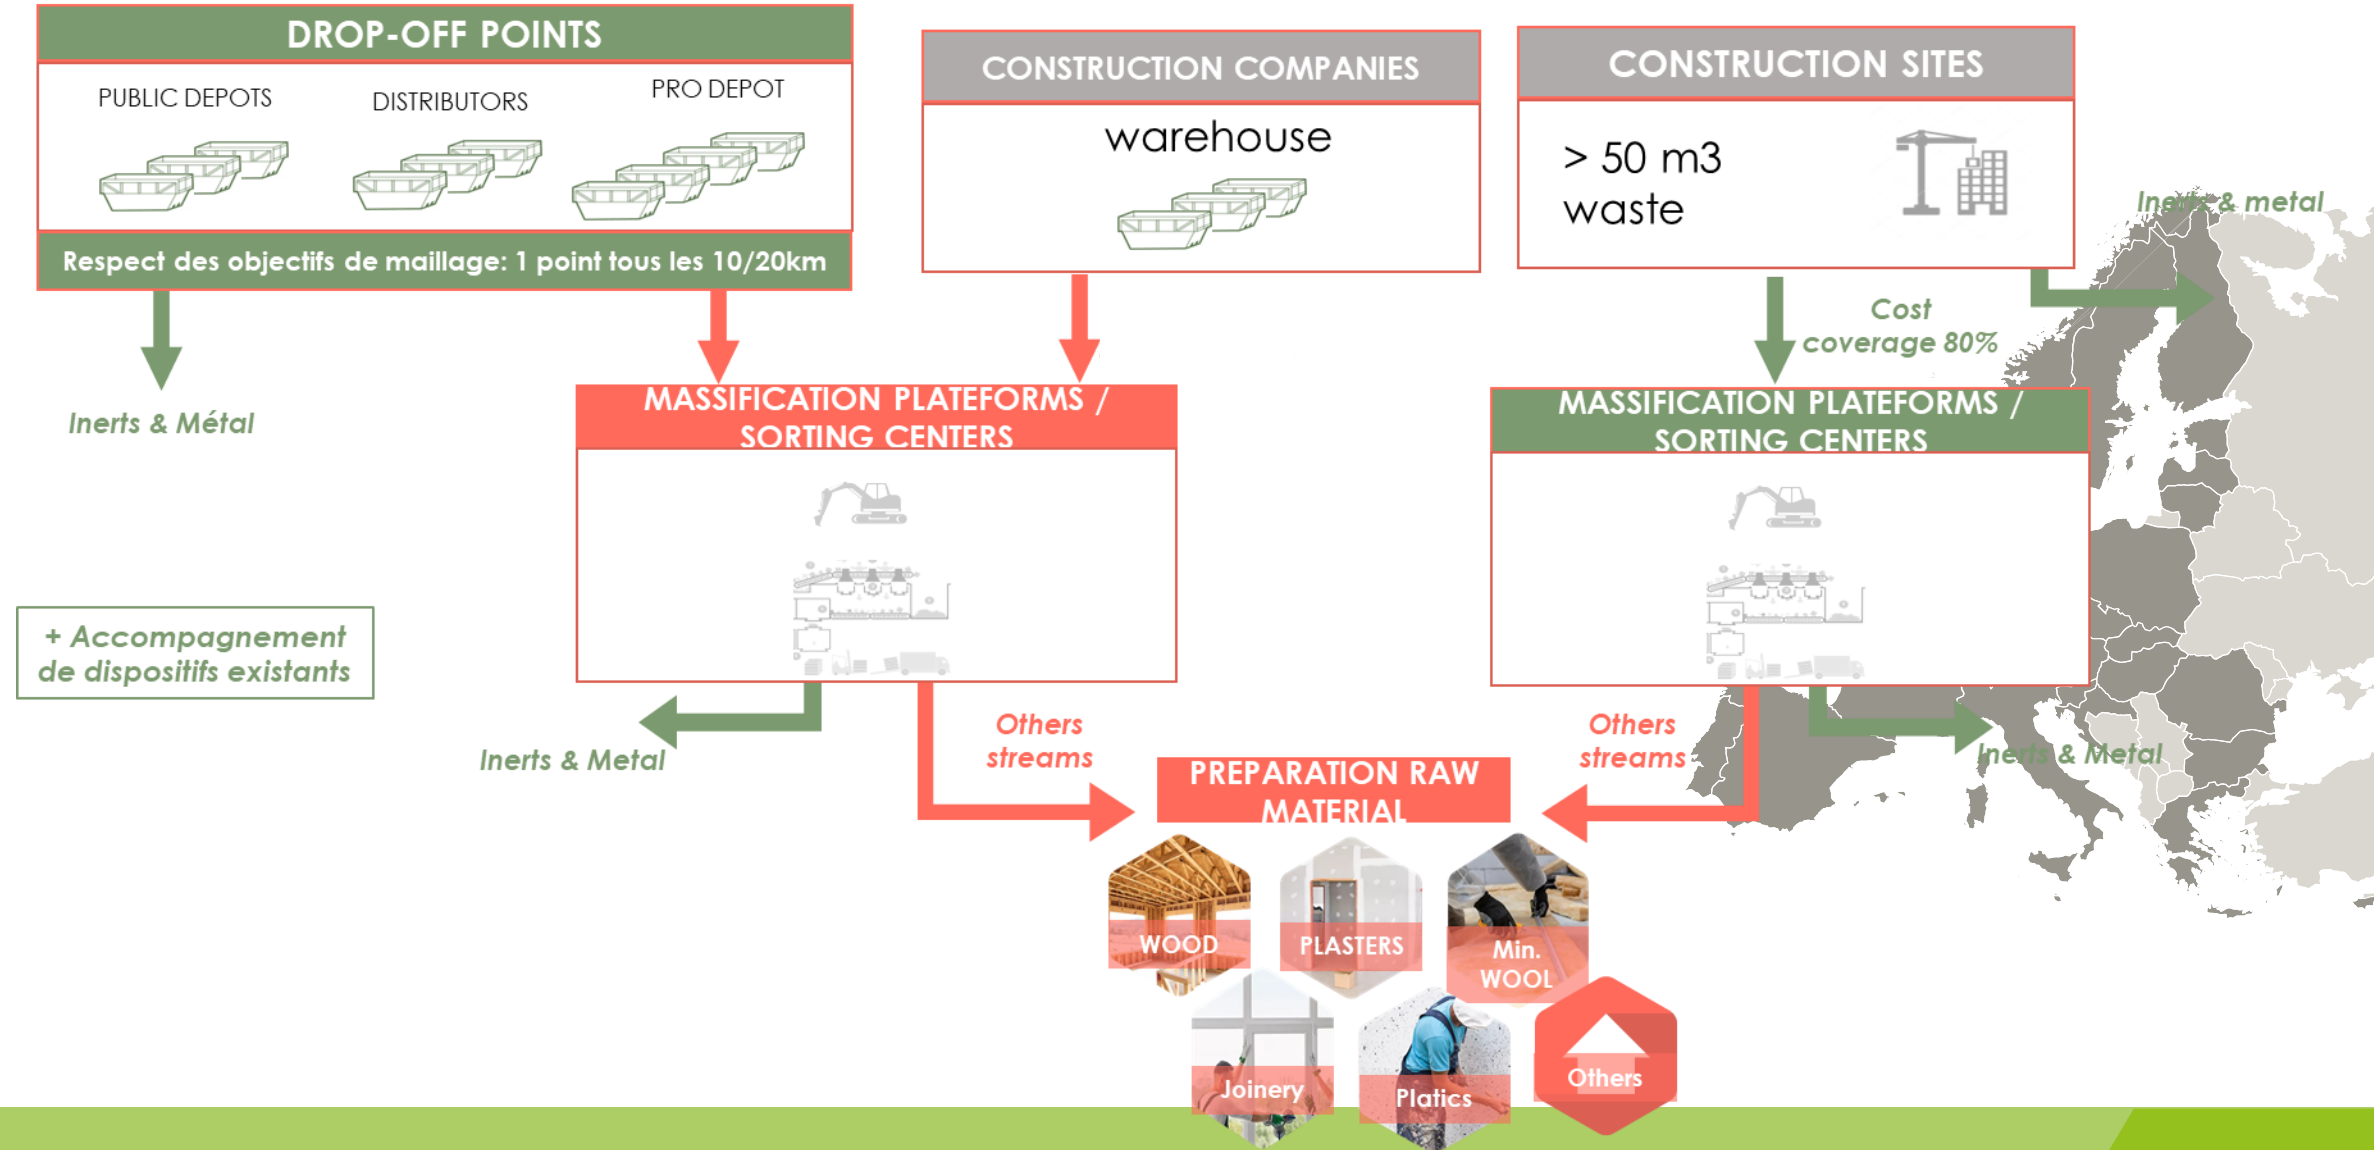

At 1st may 2023, free recovery of waste from construction sites

- For each producer, eco-contributions are due to Valobat (or other competitors)
- The waste construction or renovation holders (what ever the size)?
 - Individuals
 - Craftmen
 - General construction company
- At first January, Building waste holders can deposit their waste at deposit points free of charge when sorted
- Where are the deposit points ?
 - Public waste collection centers
 - Private and professional waste collection centers
 - General or specialised distributors
 - Warehouses of construction companies (for example, joinery or general companies, etc.)
 - Directly on construction sites when waste production exceeds 50m³

What Valobat is doing and how

➔ The operation we provide
➔ The operations we support financially

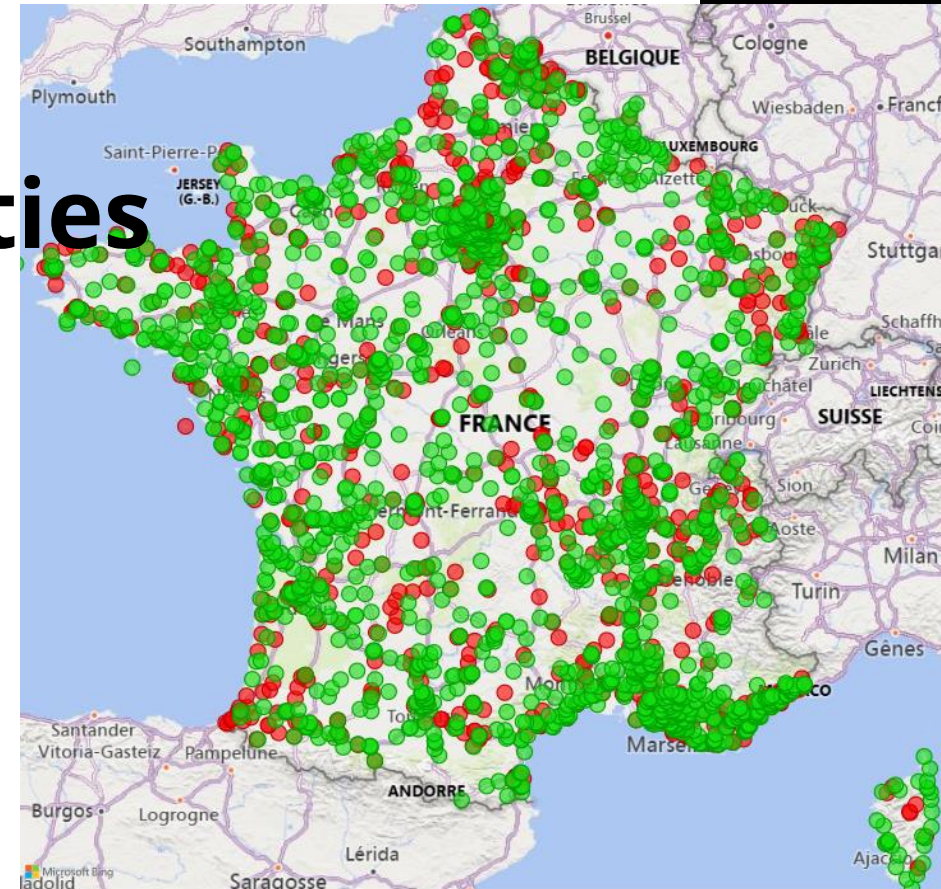

Review of the Valobat's activities

Your site generates little waste (no dumpsters)

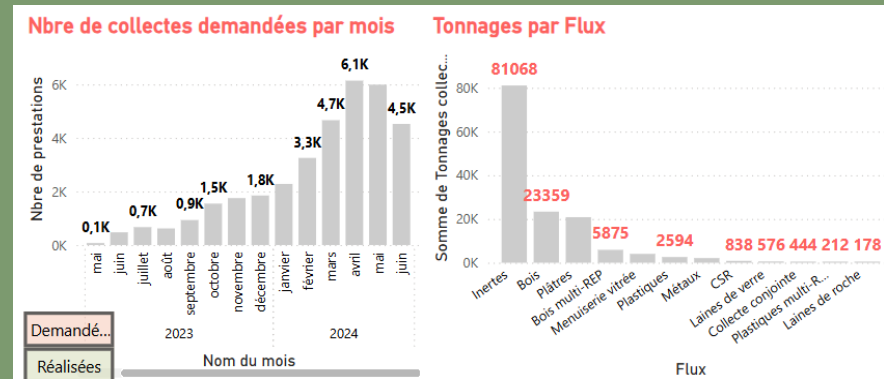

Deposit Points

Type de point de reprise	Jun. 24	End 24
Distributors	1220	1300
Private centers	230	270
Publics centers	750	2000
Inerts / Mineral centers	30	50
Total	2230	3620

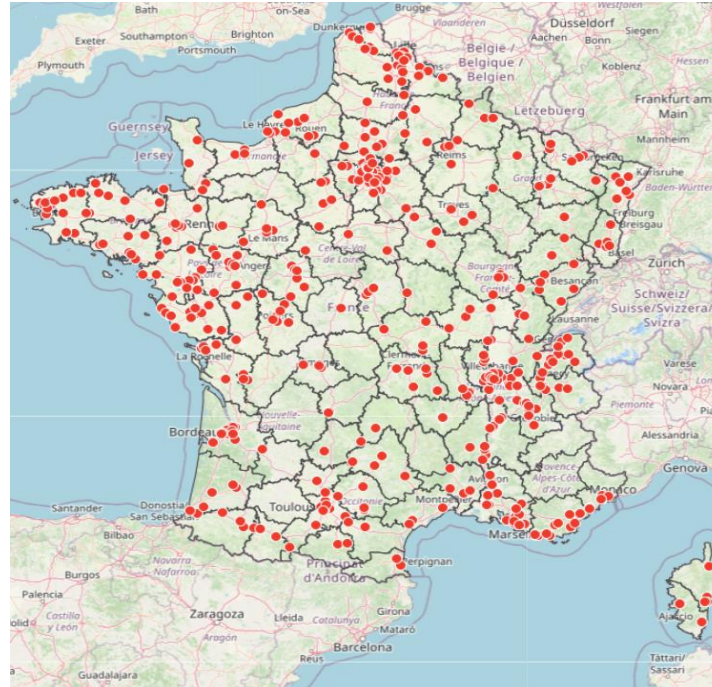

146 kt collected on Valobat' deposit points

Review of the Valobat's activities

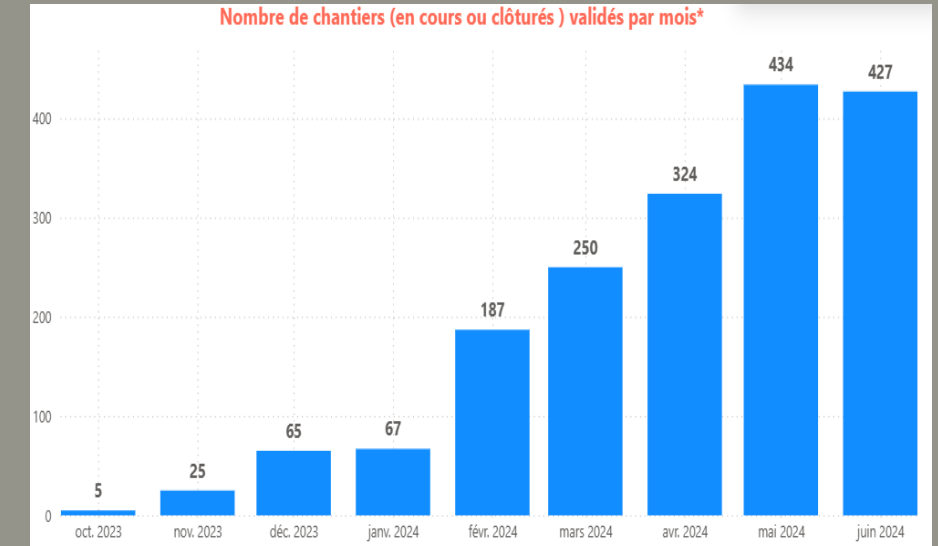

Your construction site generates a lot of waste (presence of dumpsters)

Service of recovery on construction sites

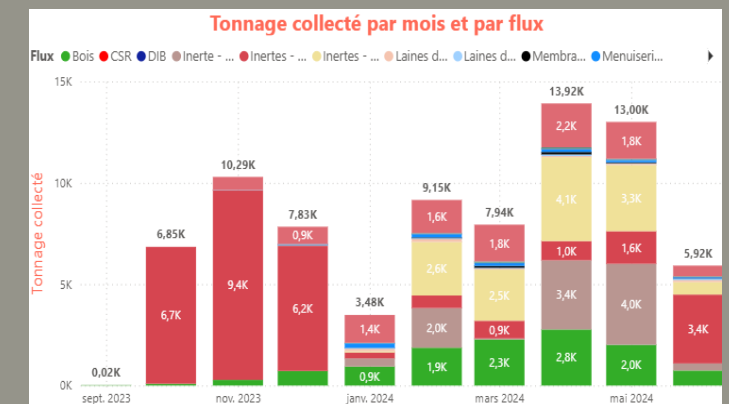

674 referenced waste managers

Number of building sites validated by Valobat teams (construction, renovation, demolition)

Collected tons : 78kt
A need to accelerate

Review of the Valobat's activities

You return and mass your waste to your warehouse

Warehouse Pick-up Service

- **821** ongoing demands
- **190** signed contracts
- **132** companies equipped with
- **76** companies that have already requested a removal

Review of the Valobat's activities

- A free collection service available to the holders waste from construction sites
- A sorting gesture to be triggered in the activity of all construction companies and all craftsmen. A mid-term project
- Many communication and incentive initiatives to sort its waste on the construction sites

Conclusion

Please provide up to three main challenges you have encountered while implementing your good practice!
