CHEERS4EU

Skive Municipality have been leading the local green transition for over 40 years powered by a climate-vision

We lead interdisciplinary collaboration to strengthen the local circular economy through a climate hub that generates knowledge and lays the foundation for real climate impact.

Our CHEERS4EU-mission: Establishing a Circular Hub

Bringing together circular activities:

We want to unite all circular economy activities in a central hub.

The hub will support circular solutions across all sectors, from industry to education and public actors.

Our CHEERS4EU-mission: Establishing a Multi-Helix Collaboration

Multi-Helix collaboration:

To promote the development of circular value chains and new business models, a strong hub is needed to facilitate multi-helix collaboration.

Experience shows that an inclusive approach, where businesses, research, the public sector, and civil society work together, is crucial for success

education Council)**

**GreenLab
Skive**

Our main interest in the following areas within the circular economy:

Storage of renewable energy – Skive is focused on utilizing and storing renewable energy sources.

Biomaterials from agriculture and the sea – There is a strong interest in utilizing biomaterials

Industrial waste management – Skive is working on recycling industrial waste, especially in the construction sector.

Green skills and education – Education in green skills is being strengthened to support the transition to a circular economy.

Skive aims to bring all these activities together in a **central circular hub to promote innovation and development** across sectors.
