# Key lessons and recommendations

## What worked:

- Presentation followed by discussion
- Allowing participants to trace on plans rather than post-its

## What didn't work:

- Distinct ways of presenting the plans

## Recommendations:

- Build confidence by engaging with local stakeholders
- Present the work as often as possible and show what is being integrated from public contributions
- Listen with attention and show that you will consider the comments (note them on the plan), discuss the challenges of taking a suggestion on board or explain why it won't be considered
- Engage in other activities that will raise awareness to what you are trying to implement
