

Meet TTS Italia

TTS Italia Staff: Olga Landolfi, Secretary General; Leonardo Domanico, Project Manager; Laura Franchi, Communication Manager

TTS Italia is the Italian ITS Association, supporting the wider deployment of Intelligent Transport Systems (ITS) and fostering dialogue between supply and demand in the field of smart mobility. Including nearly 100 members such as local authorities, PT operators, mobility agencies, research centres, transport/ITS universities departments, TTS Italia acts as a National reference for the ITS sector.

The role in SPOTLOG

TTS Italia supports an increase in quality, safety, and livability of Italian cities and regions by promoting cost-efficient innovative, environmentally responsible last mile solutions. In SPOTLOG, through its extensive contact network and Local Authority Platform, TTS Italia proposes itself as a privileged discussion forum at Regional & National level and contribute to the design of policy changes and policy implementation actions. TTS Italia is also the project Communication manager.

The importance of being part of SPOTLOG

Thanks to SPOTLOG, TTS Italia will gain additional knowledge on State-of-the-Art practices for mobility planning and logistics that can be replicated in other cities. Through SPOTLOG, TTS Italia will be able to provide freight forwarders, logistics operators, and shipping companies with adequate instruments and information to contribute to low-emission last-mile delivery schemes; to support institutional bodies to define relevant multiscale policies and integrated logistics-mobility strategies; to sustain collaboration and training on last-mile deliver concepts and solutions. By acting as the

project Communication Manager, TTS take an active role in contributing to the dissemination and knowledge transfer (at project-level, toward Italian policymakers and internationally) of approaches and practices identified in SPOTLOG through interregional cooperation.
