

VIADUCT

VIADUCT aims at promoting the creation and development of technology-based spin-offs based on smart specialisation strategies.

VIADUCT aims to accelerate regional growth by fostering the creation of spin-off and start-up companies and enhancing the policies that support them. By connecting diverse European regions, the project enables the exchange of good practices, making entrepreneurship more accessible to all.

Key activities include interregional workshops, study visits, regional reports, and stakeholder meetings. These efforts will refine policy tools, ensuring effective knowledge transfer and the sustainability of spin-offs.

Project Partners

University of Zaragoza (ES)
West Regional Development Agency (RO)
SATT Conectus Alsace (FR)
Kaunas Science and Technology Park (LT)
Western Development Commission (IRE)
Municipality of Pieve di Soligo (IT)
