Digital Islands

The project

Islands face challenges like limited accessibility and dependence on tourism, but digitalization offers solutions for greater self-reliance. By embracing digital technologies, islands can strengthen their economies and improve public services like healthcare and education. Implementing digital solutions can help overcome these challenges, making island regions more resilient and independent.

Fryslân, Mallorca, Azores,
Madeira, La Réunion, Mayotte,
Åland, Cres, South Aegean

“The current way of thinking offers plenty of opportunities for a cleaner world, so we are happy to actively contribute to this by being a testing ground for a more sustainable globe”

LAB vlieland

Lab Vlieland is a driving force behind the sustainable and circular transition and opens its workshop for ideas, projects and best practices. Sometimes as a storyteller, sometimes as a connector, but always as an accelerator: good for the Netherlands and the rest of the world.

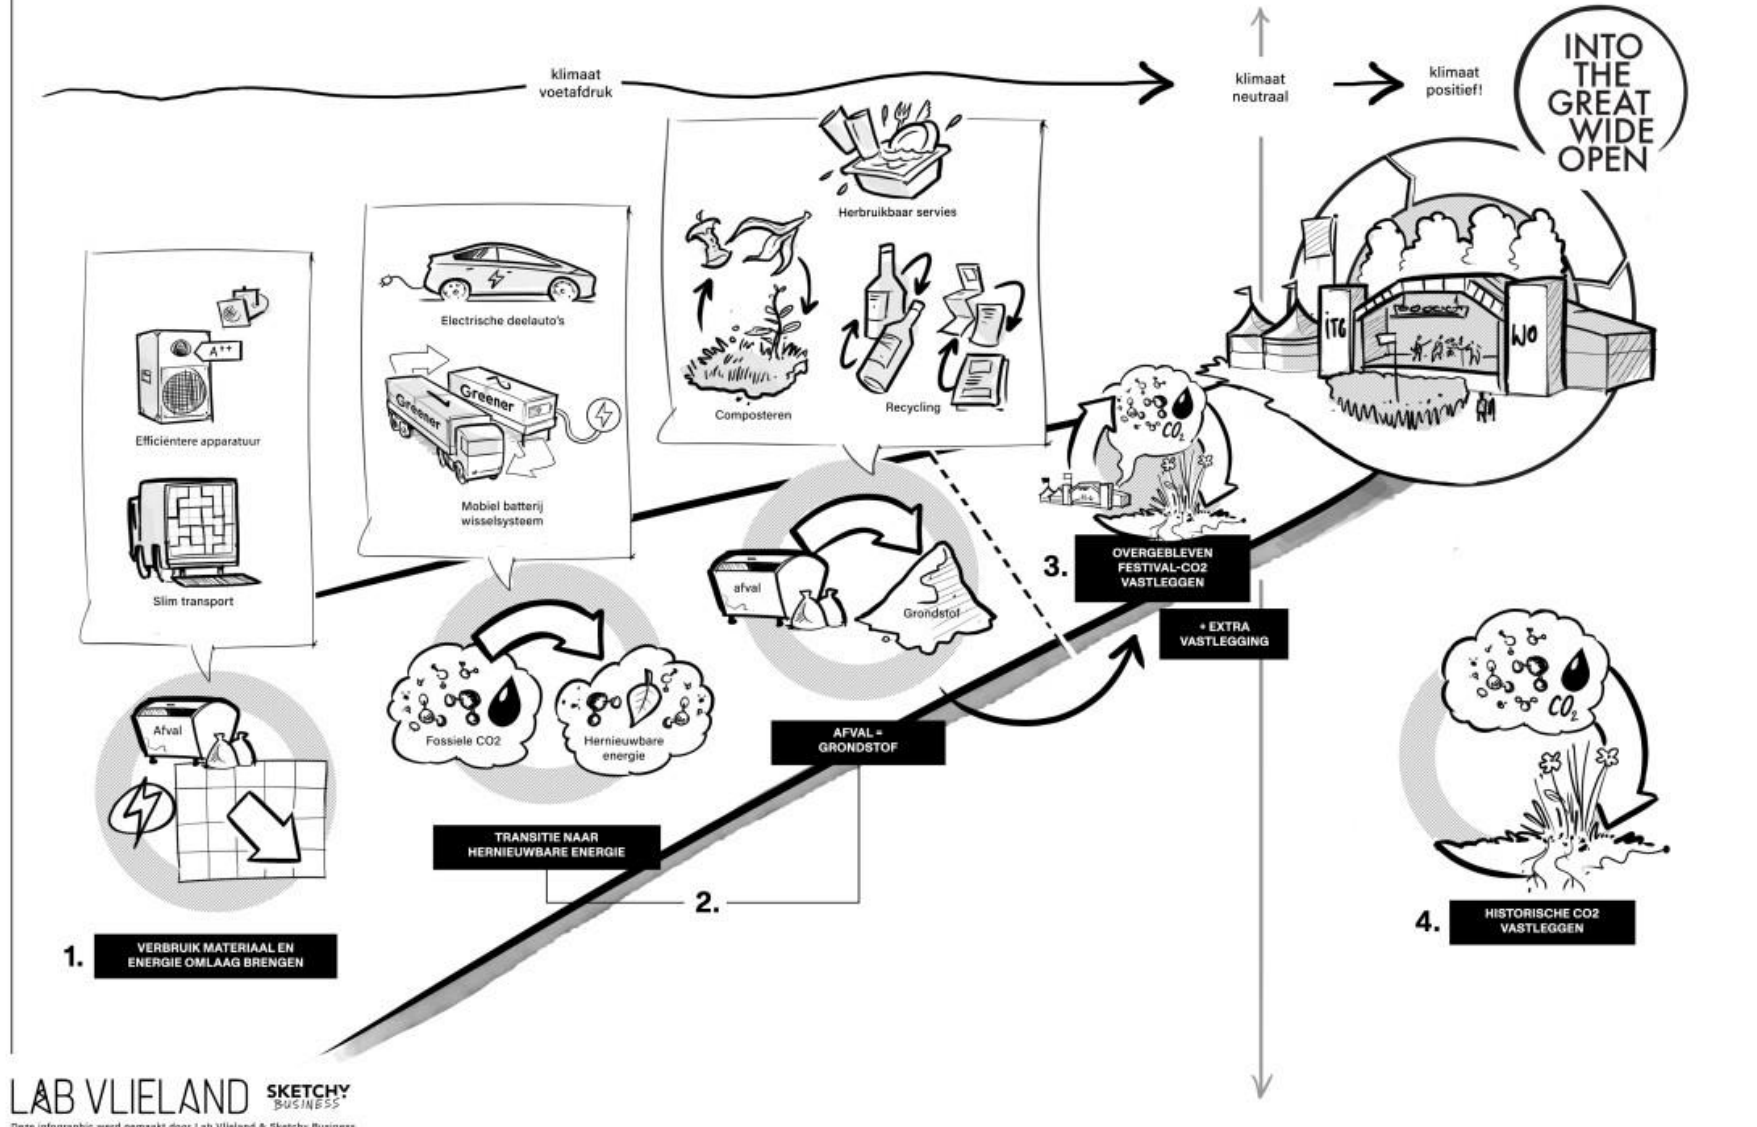

“Into The Great Wide Open and Lab Vlieland see festivals as an ideal testing ground, catalyst and stage for this social sustainable transition. The urgency is high.”

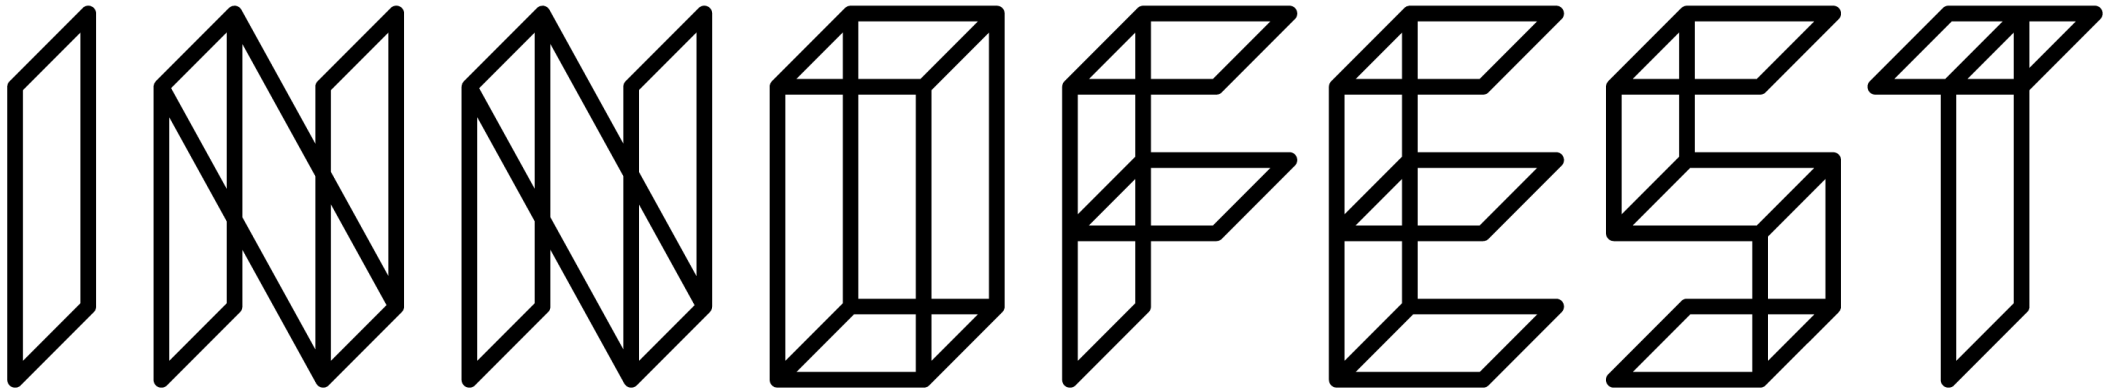

INTO THE GREAT WIDE OPEN

Into The Great Wide Open and Lab Vlieland see festivals as an ideal testing ground, catalyst and stage for this social sustainable transition. The urgency is high.

Op weg naar een circulair & klimaatpositief festival!

“Innofest gives impact makers the opportunity to test their smart solutions in practice. This happens at festivals and other living labs: test locations that come as close to reality as possible and are therefore very suitable for validating assumptions.”

In recent years, Innofest has successfully guided more than 300 sustainable and social innovators in further developing their innovation.

We innovate the \$%#& out of Europe!
