

Meet IALOVENI City Hall

Pict 1 - IALOVENI City Hall and Pict 2 - Jorge Bandeira and Eloisa Macedo from the University of Aveiro, with Tudor Mancas, DP13 Ialoveni project manager

IALOVENI City Hall is responsible for the efficient urban mobility and logistics within the city, including the provision of quality transport services. According to the Sustainable Energy and Climate Action Plan SECAP 2016-2030, the city is now focusing on zero-carbon models of transport, to contribute to pollution reduction.

The role in SPOTLOG

IALOVENI City Hall is one of the SPOTLOG Discovery Partners, mainly benefitting from the expertise and experience of other project partners, which will spark new ideas and approaches for IALOVENI's urban and rural delivery challenges, such as implementing more efficient and sustainable delivery systems with benefits for businesses, residents, and the environment in the region.

The importance of being part of SPOTLOG

Being part of SPOTLOG for IALOVENI City Hall means to become familiar with the process of interregional exchange of experience. By making intelligent use of all available resources and taking advantage of the digitalization of goods and passenger transport services, the goal is to increase its capacity to involve local communities in the creation of socially responsible logistics systems.
