The world needs transformative change if life on Earth is to be safeguarded and people are to continue to receive the services and benefits that nature provides.

a fundamental, system-wide reorganization across technological, economic and social factors, including paradigms, goals and values, needed for the conservation and sustainable use of biodiversity, good quality of life and sustainable development.

*(Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES), 2018; IPCC, 2018)*
