Objectives of the Aragón Health School

1

 Promote the participation and autonomy of patients and users to make informed decisions regarding their health and the management of their own disease.

2

 Improve knowledge and acquisition of skills in care and self-care of patients and caregivers.

3

 Create support networks in the community that promote patient contact and the durability of training actions, generating spaces for cooperation with other patient networks, organisations and schools.

Aragón Health School

Actions of the Aragón Health School

 Schedule a training offer for patients and users with expert professionals and patients

 Design and maintain a web platform that provides training resources to patients, users, caregivers and family members.

 Promote the production of teaching materials and resources aimed at improving information, literacy and training of users and patients.
